

DIMO
THE PERFECT PARTNER

**BRINGS CREATIVE SOLUTIONS FOR ALL
CAR PARKING PROBLEMS!**

Automated Car Parking Solutions from DIMO

The pioneer in automated parking systems in Sri Lanka, DIMO, offers a vast range of solutions to overcome the critical concerns of parking space, especially in the urban areas.

With the ever-increasing land utilization for commercial purposes in urban areas, land reservation for auxiliary tenancies such as parking space has become cumbersome. DIMO, a brand that constantly explores realistic

solutions to address the dire needs of the valued clientele, offers you highly customized systems that are tailor-made to suit the varied customer requirements. DIMO's range of car parking systems consists of Automated Car Parking Solutions, Vehicle Elevators, and Mechanical Car Parking Solutions.

400+ Automated Car Parking Spaces

350+ Stack Parking Units

25+ Vehicle Elevators

Fully Automated Car
Parking Solutions

A multi-level automated parking system with cars parked on metal platforms in a modern, industrial setting.

Stack Parking
Solutions

A stack parking system showing two cars elevated on a platform, with two other cars parked on the ground level.

**Modern
Problems?**
Here's some
Creative
Solutions!

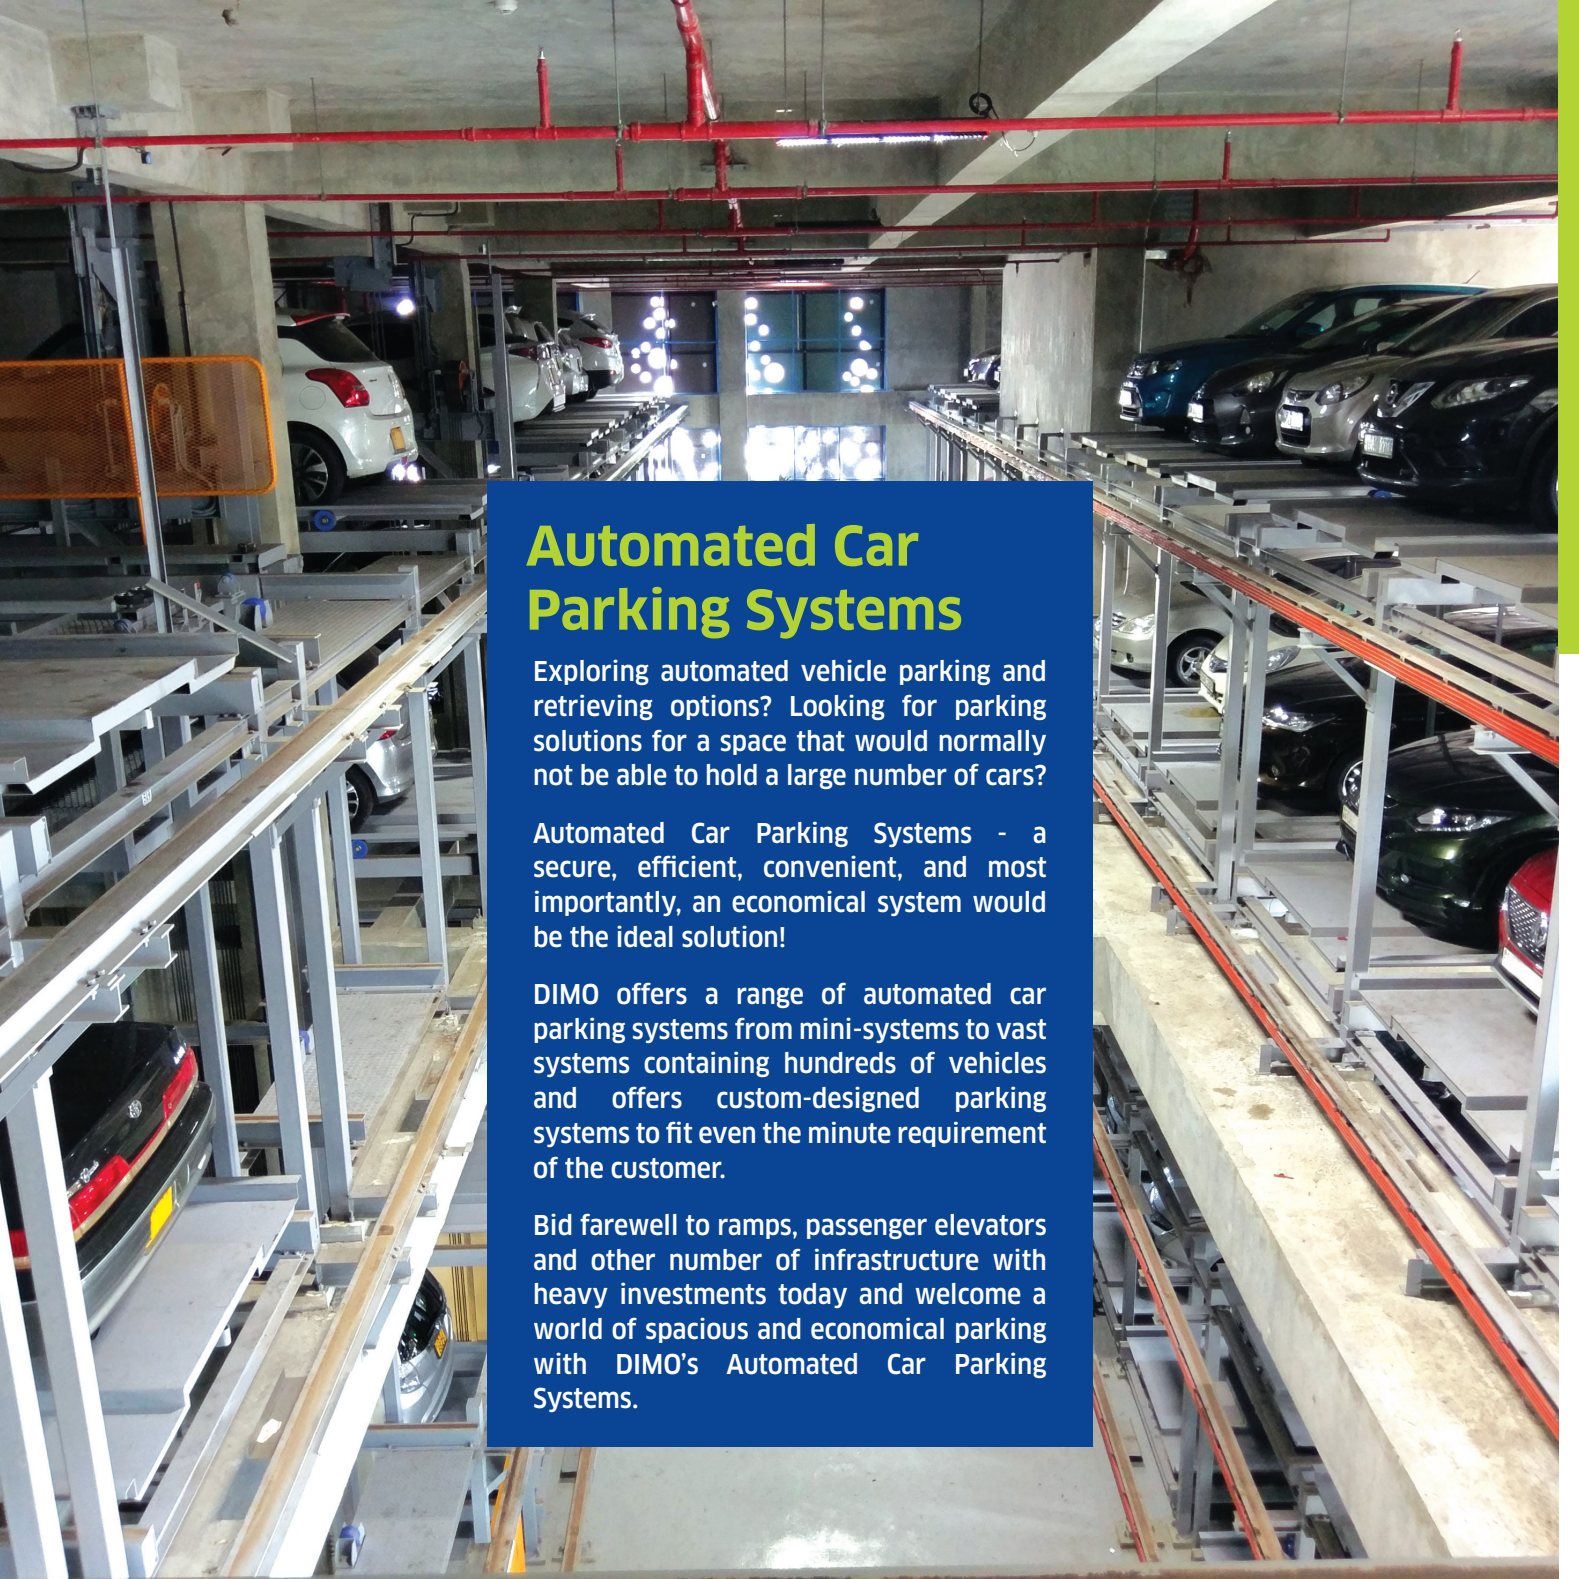

Vehicle Elevator Systems

A car is shown inside a vehicle elevator system, which is a modern, enclosed structure with glass walls and a metal floor.

Vehicle Hoist Systems

A car is shown being lifted by a vehicle hoist system, which is a large, industrial structure with a metal frame and a hydraulic lift.

Automated Car Parking Systems

Exploring automated vehicle parking and retrieving options? Looking for parking solutions for a space that would normally not be able to hold a large number of cars?

Automated Car Parking Systems - a secure, efficient, convenient, and most importantly, an economical system would be the ideal solution!

DIMO offers a range of automated car parking systems from mini-systems to vast systems containing hundreds of vehicles and offers custom-designed parking systems to fit even the minute requirement of the customer.

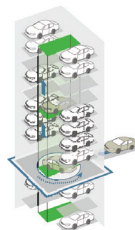

Bid farewell to ramps, passenger elevators and other number of infrastructure with heavy investments today and welcome a world of spacious and economical parking with DIMO's Automated Car Parking Systems.

The vast range of Automated Car Parking Solutions available at DIMO

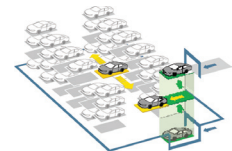

Tower Type Car Parking

The Parking Tower is designed to automatically move the vehicles which are on the pallet, vertically along the elevator and transfer horizontally left or right for storage. The best solution for medium to large scale limited space site projects.

Cart Type Car Parking

The vehicles are automatically carried and parked into multiple storey parking lots through the vertical movement of the lift and horizontal movement of the cart. A great solution for medium and large-scale automated car parking systems.

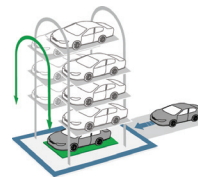

Puzzle Type Car Parking

Courtesy to a system that uses the vertical and horizontal movement of the pallet to move and park the cars, this parking solution enables fast paced car parking and retrieving capabilities. Ideal for small to medium scale projects.

Rotary Type Car Parking

The Rotary Car Parking system is designed to rotate up and down as well as right and left to position the parked cars. Another ideal solution for small-scale projects.

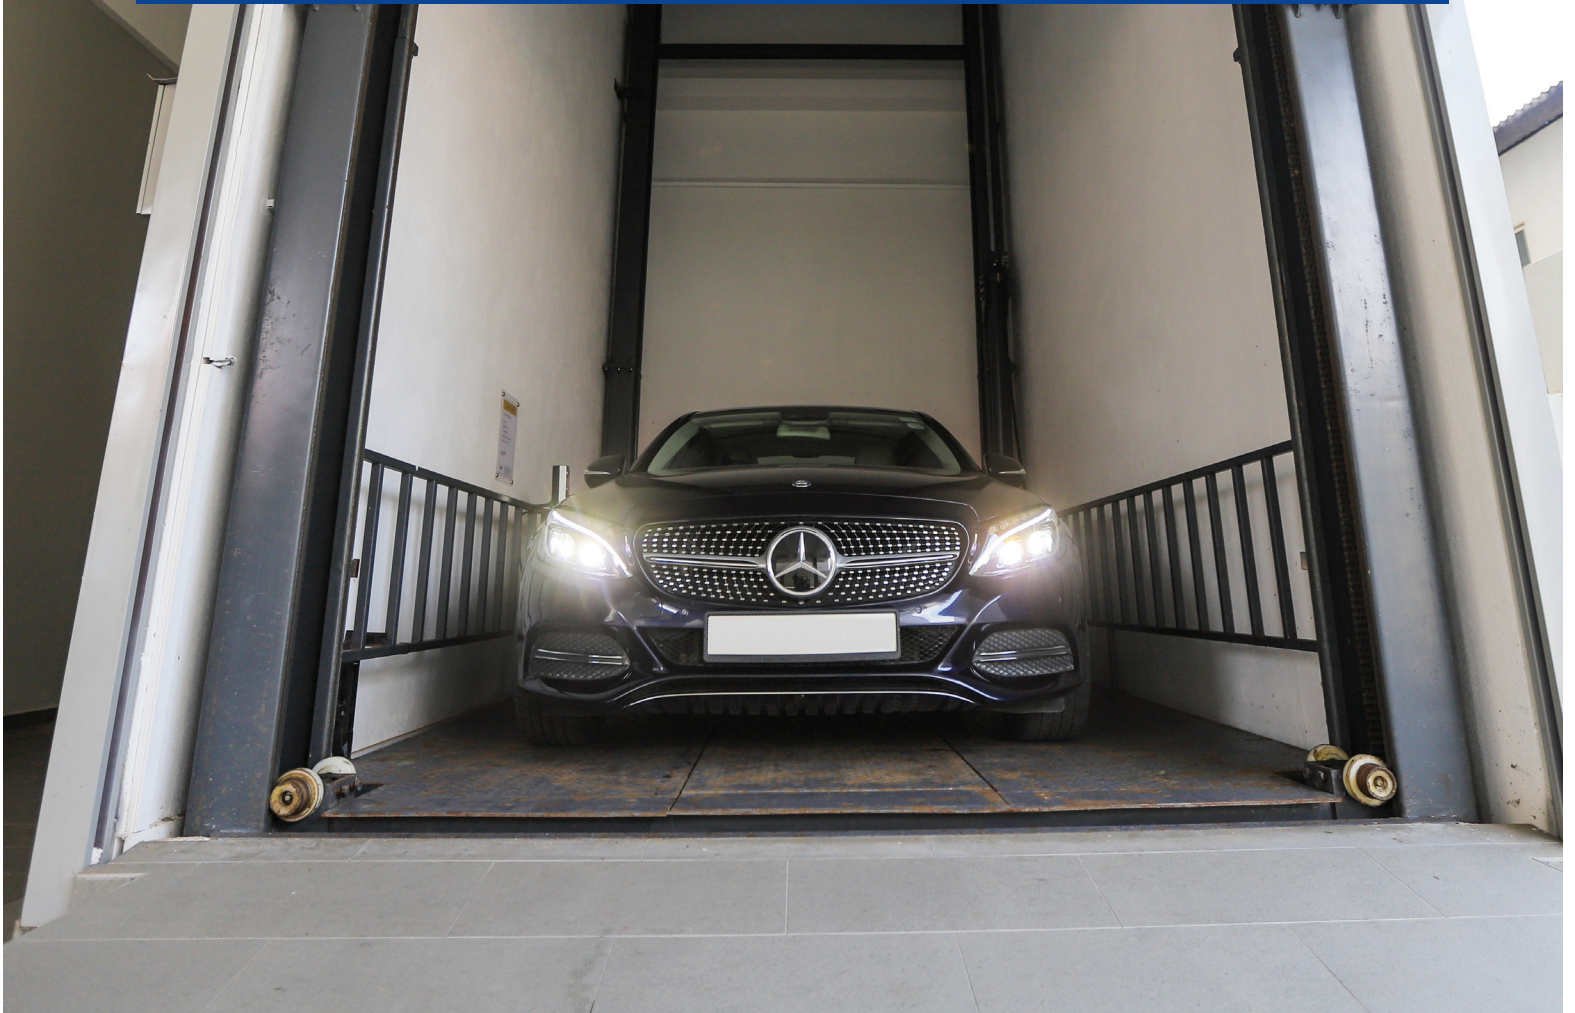

Car Elevators

DIMO offers Car Elevators, a sophisticated solution to transfer vehicles from one floor to another inside buildings. The team at DIMO is delighted to customize Car Elevator solutions to suit the varied requirements of the clientele, as we firmly believe that a one size solution does not suit all concerns!

Mechanical Car Parking Solutions

Car Hoist

With its mastery to transfer a vehicle from one floor to another, Car Hoist is a cost-effective lifting solution with maximum space utilization.

Scissor Type

Best suited for confined spaces & recommended for 2 floors of travel.

Four Post Type

Best suited for large platform sizes higher no of floors.

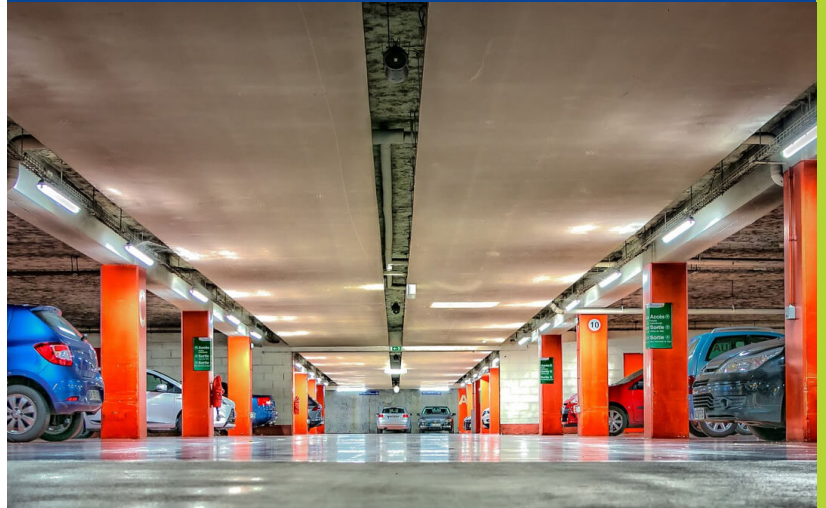

Car Stacker

Car stackers are an increasingly popular way of multiplying available car spaces in commercial and residential developments. A user-friendly, safe and a reliable solution for doubling or even tripling the number of cars that can be parked in a single conventional car space.

Seeking an innovative solution for an Apartment, a Home or a Workplace? DIMO covers them all!

Car Parking Management Systems

DIMO offers creative Car Parking Management Systems backed by a number of innovative features such as electronic guidance, monitoring, and management of parking facilities in small to large scale parking areas.

Car Parking Management systems greatly maximize the effectiveness of parking lot operations.
