RACKING, SHELVING, AND AUTOMATED STORAGE SYSTEMS

Our well-qualified engineers work closely with our Principal, SSI Schaefer to develop, plan and design a solution to optimize floor space while making full use of the roof height, to increase storage capacity while maintaining 100% accessibility, excellent goods protection, fast picking rate and good stock rotation. We also have a full range of compatible accessories for different pallet types, sizes and weights.

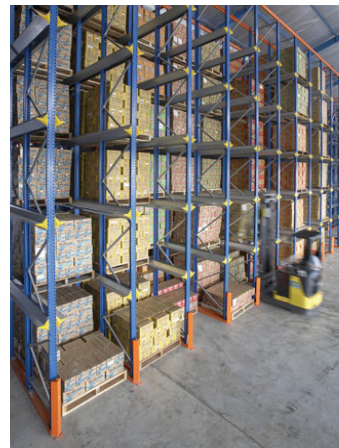

AGV WEASEL®

The automated guided vehicle WEASEL® from SSI SCHAEFER is the ideal solution for automating transport tasks in existing as well as new storage systems.

SSI SCHAEFER

RACKS FOR SINGLE OR DOUBLE-DEEP STORAGE

We offer longitudinal and lateral transverse racks, racks for single or double-deep storage along with narrowaisle or broad-aisle storage. SSI SCHAEFER's product range includes racks with a frame loading capacity of up to 30 tonnes and a transverse loading capacity of up to 4.5 tonnes. All pallet racking systems are available with an extensive range of accessories such as grates, collision protection, rear cladding, or support beams.

DRIVE IN/ DRIVE THRU RACK SYSTEM

A Drive-in/Drive-Thru Pallet Racking is a storage solution where pallets or skids are placed in steel rails with the aid of forklift trucks, that are guided by floor rails drive in the system to store and retrieve the pallets.

LOGIMAT®

LogiMat® is an automated storage and order picking solution that significantly increases the performance of your warehouse, as well as the efficiency and flexibility of your storage and order picking processes with a minimum amount of space required.

SCHAEFER ORBITER® SYSTEM

The Schaefer Orbiter® System consists of the special steel construction for the channel storage system, a channel vehicle, also known as the shuttle vehicle, and the corresponding docking station. The rack channels, in which the shuttle system is utilized, are equipped with a centering bracket at the front.

MOBILE SHELVING SYSTEM

The mobile shelves from SSI SCHAEFER enable you not only to optimize your space requirements but also free up additional space on your premises.

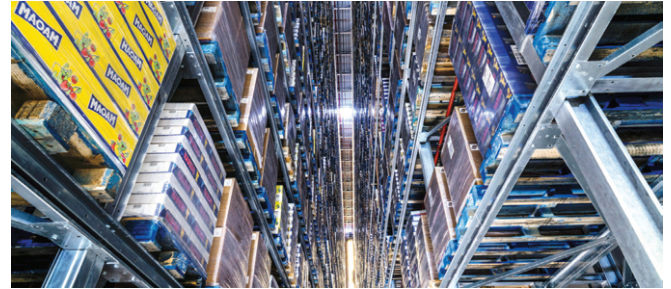

MOBILE RACKING SYSTEMS

SSI SCHAEFER's mobile racking systems offer a maximum amount of flexibility with respect to size and quality of your stored goods.

CLAD RACK HIGH BAY

SSI SCHAEFER offers expertise in high bay pallet racking for installation in warehouses or as structures to support roofs and walls. The company says its bespoke systems in rack supported structures require the shortest construction times and offer attractive depreciation possibilities.

PREFABRICATED WAREHOUSES

Our prefabricated warehouses and storage buildings speed up the construction, reduce the costs and come with tailor-made design and guaranteed durability.

FORKLIFT TRUCKS

DIMO represents world-renowned, ever-reliable Forklift trucks in different brands together with safe design and comfort for the operator, for ultimately a job well done regardless of what you are moving!

KOMATSU

FORKLIFT TRUCKS

Komatsu lift trucks meet the diversified needs of material handling businesses by using the know-how gained from years of experience in production of industrial vehicles and the latest technologies. Komatsu markets a variety of lift trucks, including small-to large-sized engine-powered lift trucks and battery-powered lift trucks. With a wide selection of lift trucks, Komatsu can meet the diversified needs of our customers.

STILL WAREHOUSE TRUCKS

For more than 50 years STILL has filled people with enthusiasm throughout the world about the development and manufacture of high grade industrial trucks with electric and diesel drives. This is because STILL places particularly high emphasis on properties that make your work easier on all our trucks.

ARTICULATED VNA FORKLIFTS

Landoll manufactures two lines of Narrow. The Bendi Electric or IC powered forklifts provide the world's first 180° articulating mast, front wheel steered design, providing unmatched maneuverability in narrow aisle storage. The Bendi Articulated Narrow Aisle forklifts can provide solutions through increased utilization of space, improved productivity, greater flexibility and maximized efficiency.

BULMOR SIDELOADERS

A sideloader truck or 4-way sideloader will transport long, bulky goods economically, quickly, and safely. This allows you to transport items within your facilities safely and securely even through narrow passages and doorways. Bulmor side loaders are especially good at mastering high lifting heights because their special core-based design and the tilt cylinder on the side of the cabin allow them to lift securely and safely.
